## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 drawn to a method of diagnosing breast cancer, classified in class 435, subclass 7.1.
  - II. Claims 8, drawn to a method of determining the progress of breast cancer, classified in class 435, subclass 4.
  - III. Claim 9-11, drawn to a diagnostic kit for detecting breast cancer, classified in class 530, subclass 387.1

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III (products) and I-II (methods) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group III may be used for a number of different processes that are very much unrelated. For example, the diagnostic kit of Group III may not only be used in the methods of Groups I-II, but may also be used to screen for bFGF antagonist and/or agonist.
3. The methods of I-II relate to methods but each method differs in method steps, modes of operation, reagents needed and serve different endpoints and effects. For example, a method of determining the progress of breast cancer requires different method steps from diagnosing breast cancer. Diagnosis requires obtaining and comparing sample of subjects without breast cancer to subjects with breast cancer and comparing the samples at various intervals.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter, and require different search strategies, restriction for examination purposes as indicated is proper.

Art Unit: 1642

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
